Only Westport offers dealers and FMCs the efficiency, convenience, and visibility of Ford Ship-Thru, backed by the confidence of working the largest, most experienced, and trusted name in natural gas engines and fuel systems.

This powerful combination helps you maximize your selling time by leveraging the most efficient method for ordering complex alternative fuel trucks.

STREAMLINED LOGISTICS

Use our **Ford Ship-Thru Code 316**, to easily coordinate a complete alternative fuel vehicle build, including upfits. When complete, the base Ford vehicle is transported to the Westport manufacturing facility where the Westport WiNG Power System is installed, calibrated, and validated. Our partner network upfits vehicles, and completed trucks are put directly into the Ford Ship-Thru system for Pre-Delivery Inspection at the selected Ford dealer.

SIMPLIFIED OPTIONS

Additional equipment options can complicate bidding and production. Westport simplifies the process by offering a wide range of the most popular fleet upfits for order with our **Ford Ship-Thru Code 316**. Working with multiple truck upfitters adjacent to our Dallas and Kansas City alternative fuel installation centers, fleets can incorporate interior customization, service bodies, lighting, headache racks, and vehicle wraps in the same ship-thru order.

RIGOROUS REQUIREMENTS

As the largest Qualified Vehicle Modifier developer and installer in Ford's QVM Program, Westport meets all the rigorous requirements for the Ford Ship-Thru Program, including engineering, process control, manufacturing quality, Q.C., and customer support.

POST-ORDER VISIBILITY

Ordering with our **Ford Ship-Thru Code 316** makes managing the complete manufacturing and upfitting process for alternative fuel trucks with additional options more efficient and effective. You have easy access to a comprehensive Visibility Report that tracks your vehicle step-by-step, from original build, to Westport WING Power System integration, options upfitting, and final delivery.

SIMPLIFIED PRICING

There are no added Westport shipping expenses with Ford Ship-Thru. Instead of paying costly fees each time the vehicle moves from manufacturing to upfitting and then to its final destination.

With over 20,000 conversions performed to date, our Ford Ship-Thru is a truly efficient and effective process for FMCs, dealers, and customers. You enjoy a single point of accountability, single invoice, and single point of contact. Plus, we offer the widest selection of Ford products.

You'll have the confidence of working with the largest Qualified Vehicle Modifier developer and installer in Ford's QVM Program. The Westport WING Power System meets all Ford OEM safety testing requirement and the Ford vehicle warranty remains intact.
